Outside patios are great for dining and entertainment. However, when it's too cool wouldn't it be great if you could heat your area to enjoy the outdoors? Extend your patio use throughout the cooler seasons when you provide heaters for your customers, or for your home patio.

HotZone™ outdoor electric patio heaters only warm people and objects and not the air in between, making them ideal for drafty areas and external use.

HotZone™
Portable
Patio Heater
HZE15120SP

Cozy up your patio and enjoy the outdoors longer with targeted spot heating.

In-Ceiling Mounting Accessories

Three different options available.

HotZone™ Electric Indoor/Outdoor Heaters

Our patented IRLens™ focuses five times more infrared heat into the area than heaters without the lense. This revolutionary design makes HotZone™ the most energy-efficient and hottest infrared heater on the market today.

Dare To Compare
